bZx	Ethereum	bZx.executeTrade	Price Manipulation	high

Library risk correlation

KILLER QUERY: for each shared library, total real exploit loss across contracts that use it.

BalancerCore	2.x	1	0	0.0
MorphoBlue	0.5	1	0	0.0
Gearbox	0.4	1	0	0.0

Cross-contract attack chain

Multi-hop CALLS chains (2..6 hops) from a contract that has an exploited/patched flagged function - composite attack surfaces across protocols.
